#### Unitary Patents and the Unified Patent Court 105

2014 sees the introduction of the European patent with unitary effect (commonly known as the unitary patent) and the Unified Patent Court, intended to provide patent protection across Europe. In this article, we discuss the nature of the unitary patent and the structure of the Unified Patent Court, as well as examine what may be expected under the new regime.

VICTORIA MCEVEDY

#### Defamation and Intermediaries: ISP Defences 108

A review of recent developments in the defences for ISPs facing defamation claims in English law. Covers the E-Commerce Directive, the Defamation Act's secondary responsibility defence and common law innocent dissemination. Looks at issues impacting search engines and hosts and the impact of moderating and other activity. Considers the impact of the Court of Appeal's decision in *Tamiz v Google* on publication.

NAQEEB AHMED KAZIA

#### Telecommunication Interconnection Regulatory Techniques 113

With the world going global, there is a rise in the use of telephones, and as a result more and more operators are entering the telecom industry. As the saying goes for one to gain, another has to lose; similarly a new entry in the market costs the incumbents a loss of profit as well as market share and thereby they resort to various means for restricting the entry such as non-provision of interconnection service etc. This is where the need for regulation arises and regulators come into the picture.

BEN HOYLE

#### Apple v Samsung: The Song Remains the Same? 117

This article provides a further dispatch from the worldwide intellectual property battles of Apple and Samsung. It looks at recent decisions and revisits previous predictions. It examines what else can be learnt for those wishing to enforce their intellectual property in multiple jurisdictions.

#### Artificial Intelligence 119

Since the turn of the 21st century artificial intelligence has started to pervade daily life. Although there are as yet no computer programs that fully rival human capabilities, artificial intelligence nevertheless has the potential to outperform humans in performing certain activities. This article surveys the history of the field and looks at some of its more recent developments.

#### Criminal Liability for Cyber Defamation: Jurisdictional Challenges and Related Issues from Indian Jurisprudence 121

New technology brings new challenges to the law-enforcing machinery. As a natural consequence, like many other cyber related wrongs, cyber defamation which is conducted in the world of virtual reality also needs to be tackled by the authorities concerned and it will also be the task of the authorities to see that the wrongdoers are punished in accordance with the laws. In respect of imposing criminal liability for committing cyber defamation under Indian laws, the article makes an endeavor to investigate some fundamental issues such as: Should the person committing cyber defamation be punished under the traditional defamation laws in India? Are there jurisdictional hurdles? Can internet service providers be held liable for defamatory content posted on websites in India?
