#### **LTE-Uncensored: The New Wi-Fi?** 223

A little-known debate is raging in the wireless industry's technical community regarding the use of the worldwide standard technology, LTE, in unlicensed spectrum alongside WiFi. A major concern is how the two technologies will coexist in the same spectrum band given that WiFi's protocol is designed to "back off" when interference is detected while LTE's protocol is not.

MADELEINE THOMSON

#### **Software Developer's Drafting Error Meant Employee Free to Join the Competition** 225

This article considers the lessons to be learnt for employers and employees from the recent decision in *Prophet Plc v Huggett* in which the Court of Appeal ruled that the judge was wrong to re-draft a software company's non-compete clause to give it practical effect.

STEPHEN MASON

#### **The Control of Dual-use Technology** 228

Hackers and thieves, to further their aim of theft and gaining entry into computer systems, use legitimate security software that provides for the integrity and confidentiality of electronic data. This article considered the recent attempts to prevent the export of such technology, considering the Wassenaar Arrangement the new European Union Regulation and the law in the United Kingdom.

GENEVIEVE MORRALL

#### **Frontier Systems Ltd (t/a Voiceflex) v Fripp Finishing Ltd** 239

The Technology and Construction Court has dismissed a claim brought by a VoIP provider (Frontier Systems Ltd (t/a Voiceflex)) against a customer (Fripp Finishing Ltd) for £35,000 in respect of calls made on Fripp's system after its systems had been hacked. The court did accept that a number of terms were implied into the contract; however, the court did not find that Fripp had breached any of these terms, predominantly for lack of particularity.

SHERRY GONG AND KURT TIAM

#### **New Rules Provide a Framework for Shanghai Free Trade Zone to Open the Doors on Value Added Telecommunications Services: A Cause for Optimism?** 241

Since the establishment of the Shanghai Free Trade Zone (Shanghai FTZ), investors have been closely monitoring the liberalisation policies in the telecommunications sector. This article examines what the possible outcomes will be.

### Special Briefing

THOMAS HÖPPNER

#### **International Roaming Regulation: Roaming into a (Dis-)connected Continent?** 246

This article outlines the legislative proposals of the European Commission and the European Parliament for an abolition of international roaming charges. Considering the current European legislative framework and the effectiveness of the proposed amendments, we conclude that neither of the proposals ensures a coherent re-organisation of international roaming.
