Technically Unpatentable: Invention Fails to Bring More to the Party than the Software Alone 21

This article discusses the recent case of *Lantana Ltd v The Comptroller General of Patents, Design and Trade Marks*, where the Court of Appeal looked at the question of whether the UK Intellectual Property Office had been correct to refuse a patent application for software that moves data between computers because it considered the invention to be unpatentable subject matter under Section 1(2) of the UK Patents Act.

The Force is not so Strong with Yoda: £444,000 Damages Awarded in Defamation Case between Online Marketing Companies—*ReachLocal UK Ltd v Bennett* 24

An article on the recent case assessing claimants' ability to recover costs spent in mitigating loss suffered as a result of a "campaign of denigration" conducted by a rival online marketing company via email and telephone.

KIRSTEN TOFT

Right Holders Beware: Using Ebay's Verified Rights Owners System 27

This article comments on the recent case involving Ebay's Verified Rights Owners System (VeRO). The recent case of *Cassie Creations Ltd v Blackmore*, has sought to confirm whether an objection raised through the VeRO system can amount to an unjustified threat. The result of this case has left rights owners uncertain as to whether to use the VeRO system.

JENNIFER AGATE

Online "Cyber Bullying" Campaign: £70,000 Awarded to Victim 29

An article discussing a recent damages award of £70,000 made by the High Court to the victim of a "continuing onslaught" of defamatory tweets, in a case preceding the implementation of the Defamation Act 2013

MARION ROSENBERG

And You Are ...? Will the New Regulation on Electronic Identification Help Universities when Registering Overseas Students? (Part 1) 31

Part 1 of this article looks at current student admissions processes and other aspects of the student lifecycle at which requirements for identification exist. It then goes on to examine what identification and authentication aids are used, addressing gaps in functionality, as well as security and privacy concerns. It highlights various inconsistencies and the need for several simultaneous processes.

The Cascade of Decaying Information: Putting the "Right to be Forgotten" in Perspective 40

This article starts with a summary of the discourse on the "right to be forgotten". After elaborating on its potential value and analysing public (mis-)perceptions it is submitted to understand it as part of the cascade of decaying information and transform it into a tool to be used in closed information systems.
